

Dear Respected Members of Congress:

Media Monopoly is not a debate it is a BLATANTLY OBVIOUS PROBLEM OF NATIONAL INTEGRITY to anyone and everyone who is aware of the scope of available world news and information and how in the US we are consuming on a daily basis an embarrassingly SMALL percentage of that news and information.

The mainstream media has become an overwhelming force and influence in our everyday lives. Supposed to inform and help us educate ourselves about local and world events, it is an embarrassment in the global community that news and information dissemination is controlled by a such a small, powerful handful of providers and owners.

I propose further decentralization of the media - which is happening with amazing results at the grassroots level - and for the power-holders to recognize the value of a more diverse scope of world media.

It is with all this in mind that I URGE you NOT to lift FCC restrictions that are in place to assure as much as possible that the media stay as far-reaching as possible.

thank you,
jennifer packard
